Lead Acid Battery Recycling
Now at MAWC Dumpsite

Lead-Acid batteries are car and truck batteries, and those used in solar systems.
They are toxic and very bad for your health, especially for children.
Handle batteries with care to protect yourself.

- MAWC are now buying Used Lead Acid Batteries.
- Bring the batteries to MWAC Batkan Dumpsite.
- Batteries are bought by weight, at 30¢ per kilogram (14¢ per lb).
- DO NOT TIP OUT THE ACID INSIDE as the price includes acid.
- Any size lead acid battery is accepted, including small sealed ones.
- Batteries must be clean on the outside when you bring them in.
- Contact Joan at MAWC at 247-2701 to arrange to drop off batteries.
- You will need to take ID with you when selling batteries as an anti-theft measure.

Do not throw batteries around when loading onto your truck as then they break and leak acid.

If a battery is leaking please wash it down with lots of water before bringing to MAWC.

Contact WUTMI on 625-4296 for more information

Thank You
