Natural Solutions for Island Resilience

# CIRCULAR

**FILE:** AP 6/5/6
**DATE:** 26 May 2014
**CIRCULAR:** 14/47

**TO:** SPREP National Focal Points: Only Participating Countries in PacWaste
PacWaste Focal Points

**SUBJECT:** **PacWaste Launch of Project Webpage**

Dear Members,

As you aware, the PacWaste project is a €7,850,000, four year project (2013-2017) funded by the European Union through the Secretariat of the Pacific Regional Environment Programme (SPREP) to improve certain aspects of regional hazardous waste management.

I am pleased to advise that as part of management of the project here at SPREP, a new dedicated webpage has now been launched for the PacWaste project within the SPREP website as illustrated below.

The webpage, which will be regularly updated as the project evolves, provides information about the project goals, anticipated timeframes and will showcase the hazardous waste interventions put in place to improve asbestos, healthcare waste, E-waste and atoll integrated solid waste management in up to 14 Pacific island countries plus Timor Leste.

The PacWaste webpage will allow users to explore the project by thematic area or participating country and includes a semi-interactive map. Links to PacWaste circulars, media releases, podcasts

as well as related publications and strategies are included for references and background. For more information visit www.sprep.org/pacwaste

I look forward to your ongoing interest and participation in this important programme.

Yours Sincerely,

David Sheppard
**Director General**
