Différents scales of cooperation

The EEZ of New Caledonia is an exceptional biodiversity reserve

Sustainable management of Ocean needs to look at different scales

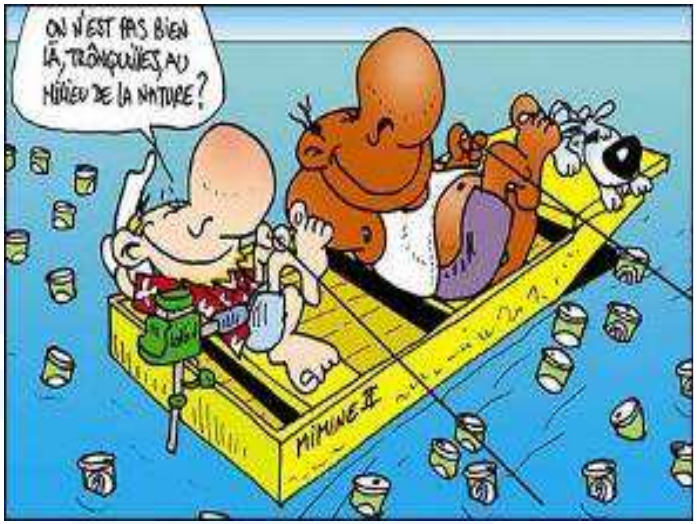

Feedbacks, successes and limits

Successes of regional cooperation

Encouragement of knowledge / data acquisition
Scientific and technical reinforcement
Political recognition of the interest of regional vision
Feeding of international dialogue
Irrigation of conservation and planning policies

Factors of success

* Begin small
* Put consultation on the core
* Rely on regional organization
* Engage trustworthy links with donors
* Consultation, a strong point in the Pacific
* Use the new mapping tools
* Talk about success stories
* Flexible member status of regional organization

Feedbacks, successes and limits

Limits and difficulties

- Efficiency of legal tools and governance of cross boundaries MPA
- "Superior" national interest
- Different language and standard
- Taking into account climate change
- Collective awareness and solidarity
- Transfer and use of new technologies, models and knowledges

Thank you for your attention !
